COFFEE WITH PEERS

Join us for a Topical Wellness-Focused conversation and presentation on the following dates:

THURSDAY, JULY 16TH

AT 8:30 AM - 10:30 AM

TOPIC: THE DANGERS OF KRATOM

Kratom is widely marketed as a natural, harmless supplement — but the science tells a different story. This session takes a research-based look at what Kratom really is, how it works in the body, and why it presents a growing public health concern. ***This course is a free benefit for PSPSA Members.***

About The Speaker:
Presented by Dennis Disney, EMT
Fire Science | Nursing Student | First Responder
Healthcare Professional

Dennis has conducted extensive research on Kratom and has educated multiple agencies on the risks it poses — regardless of how it is marketed to the public. While the science is ever-evolving, this session reflects current knowledge and real-world application.
